If you need to use statistics to support your argument, it would be a good idea to present the data you have collected or you have read about in the form of graphs, tables, and charts. This is because data is difficult to understand and also boring without visual aids.

The picture above is a graph. Look at the labels (e.g. vertical axis), try to work out what each label is for, and [complete this quiz](#).

If you like, you can also try four interactive activities on presenting graphs and tables via [this related link](#), developed by the

Department of Modern Languages of the University of
Southampton.
